

Open formats wrapup

- Leadership: propose that a discussion takes place within IUPAC SCDS about this
- Thought: create a short letter/document/manifesto describing motivation behind open chemistry file formats. Emphasize the current limited scope is just a first step. Include examples, get as many people to sign on as possible (?)
- Action: collect some good examples showing common problems with current formats as well as incompatible extensions (GL)
- Action: figure out who to contact within BIOVIA about opening up the CTAB documentation; include good description of what that means (?)
- Action: contact Daylight about opening up the SMARTS documentation; include good description of what that means. (?)
